

PET-G

easy to print

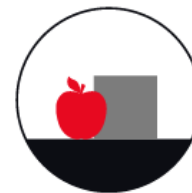

high chemical
resistance

good mechanical
strength

highly transparent

made with raw
materials approved for
food contact

PET-G - Exceeding expectations! Noctuo PET-G is a truly versatile, astonishingly strong material, dedicated for all 3d printing enthusiasts – beginners and professionals alike. With development of advanced formulation based on medical class materials, we were able to minimize stringing and profile parameters sensitivity while significantly improving strength and possible print speeds.

Main use:

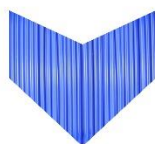

- functional prototypes,
- home and office gadgets,
- printer parts,
- ornaments, decorations,
- toys,
- machine elements.
