	Inhalation:	Inhalation:No adverse effects are expected under normal conditions of use. Direct inhalation exposure is not expected. Dust or potential decomposition products of melted/overheated mixture in high concentration can cause airway irritation. In this case remove the affected persons to a fresh air. For those providing assistance, avoid exposure to yourself or others. Use adequate respiratory protection. If respiratory irritation, dizziness, nausea, or unconsciousness occurs, seek immediate medical assistance. If breathing has stopped, assist ventilation with a mechanical device or use mouth-to-mouth resuscitation. Call immediately medical emergency.						
	Skin contact:	No adverse effects ar In case of a skin cont area with a stream of	tact with melted	polymer do not rem	nove it from the			
	Eye contact: No adverse effects are expected under normal conditions of use - no special requirements needed Dust or potential decomposition products of melted polymer can cause eye irritation. Seek medica advice if the eye irritation persists. Direct contact of eye with melted product can cause serious eye damage. Seek professional medical help immediately.					. Seek medical		

Ingestion: No adverse effects are expected under normal conditions of use - no special requirements needed. This type of exposure is not expected.

<u>Filament</u>		SAFETY DATA SHEET conforms to OSHA Hazard Communication Standard (29 CFR 1910.1200)

Ingestion of a smal Inhaling of loosen dust or potential decomposition products of melted/overheat ate moderately respiratory system and mucous membranes.	ll amount			
	No specific therapy known. Use supportive and symptomatic treatment.					
SEC	TION 5: FIREFIGHTING ME	ASURES				
5.1	Suitable (and unsuitable) ex	tinguishing media				
	Suitable extinguishing media:	water spray, alcohol resistant foam, dry-powder, carbon dioxide				
	Unsuitable extinguishing med	ia: direct water stream - could spread fire				
5.2	Special hazards arising from the chemical Flammable. Incomplete combustion and thermolysis may produce toxic, irritating and flammable decomposition prod (such as carbon monoxide, carbon dioxide, sooth, aldehydes and other products of organic compounds decomposition Do not inhale smokes.					
5.3 Special protective equipment and precautions for fire-fighters Fire Fighting Procedures: Keep people away. Isolate fire and deny unnecessary entry. Use water spray to cool exposed containers and fire affected zone until fire is out and danger of re-ignition has passed. Fight fire from location or safe distance. Move container from fire area if this is possible without hazard. If possible, avoid lea to enter sewage system or environment.						
	<u>Special Protective Equipment for Firefighters:</u> Wear positive-pressure self-contained breathing apparatus (SCBA) and protective firefighting clothing (includes firefighting helmet, coat, trousers, boots, and gloves). Avoid contact with this material during firefighting operations. If contact is likely, change to full chemical resistant firefighting clothing with self-contained breathing apparatus. For protective equipment in post-fire or non-fire clean-up situations, refer to the relevant sections 6 and 8.					
SEC	TION 6: ACCIDENTAL REL	EASE MEASURES				
6.1	No special requirements are n	etive equipment and emergency procedures eeded. Observe all user considerations and safety measures. All unprotected pers tive measures may be necessary, depending on the specific circumstances and/or sponders.				
6.2	Methods and materials for containment and cleaning up Collect mechanically. All storage vessels have to be labeled. Dispose according to valid legislation (see Section 13); recycle.					
SEC	TION 7: HANDLING AND S	TORAGE				
7.1	Precautions for safe handling Observe all user considerations, safety measures and exposure limits. See Section 8 for advice on the minimum requirements for personal protective equipment. Avoid breathing decomposition products or loosened dust. Use only adequate ventilation. Observe all fire protection measures (work with open flame is prohibited, remove all possible sources of ignition, smoking is prohibited). During the product's thermal treatment small amounts of volatile organic compounds may be released. Thus suction and discharge of these emissions must be locally secured. Dust from the product represents a potential explosion hazard and as such it must be continuously removed. All devices must be properly grounded.					
7.2						

<u>Filament</u> 🕅					AFETY DATA S IA Hazard Communication Sta		00)

	CAS	Substance nar	ne		Occupational exposu	re limit			
	-	-			-				
		iological limits: n	ot set						
	Exposure c								
	Appropriate	engineering cont	rols:						
	smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Personal protective equipment selections vary based on potential exposure conditions such as applications, handling practices, concentration and ventilation. Information on the selection of protective equipment for use with this material, as provided below, is based upon intended, normal usage.								
	Individual protection measures, such as personal protective equipment:								
	 a) Eye / face protection No special requirements are needed under normal conditions of usage. Avoid contact with eyes. If risk of eye contact exists, use safety glasses with side shields. 								
	 b) Skin protection: No special requirements are needed under normal conditions of usage. When manipulating with heated/hot material use heat isolating gloves made of para-aramid/carbon with thermal isolation up to 270°C and forearm protection. Example of recommended gloves: KCL, Karbo TECT with leather forearm cuffs, with thermal isolation up to 350°C. 								
	NOTICE: The selection of a specific glove for a particular application and duration of use in a workplace should also take into account all relevant workplace factors such as, but not limited to: Other chemicals which may be handled, physical requirements (cut/puncture protection, dexterity, thermal protection), potential body reactions to glove materials, as well as the instructions/specifications provided by the glove supplier. Immediately change damaged gloves								
	 c) Respiratory protection: No special requirements are needed under normal use conditions. Ensure appropriate ventilation or exhaustion at the workplace. Do not inhale decomposition products from overheated product or dust produced by mechanical operations. If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate protect worker health, an approved respirator may be appropriate. Respirator selection, use, and maintenance must be in accordance with regulatory requirements, if applicable. Types of respirators to be considered for this material include: half-face particle filter respirator, type N95. 								
	d) Thermal hazards: No such risk when normally used.								
	Comply by apply	Environmental exposure controls: Comply with applicable environmental regulations limiting discharge to air, water and soil. Protect the environment by applying appropriate control measures to prevent or limit emissions. All storage and manipulation areas have to be equipped for the sanation of possible leakage. See information in sections 6 and 12.							
	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

SEC	TION 11: TOXICOLOGICAL		N			
11.1	Information on hazard classes as defined in Regulation (EC) No 1272/2008 No adverse effects for human health are expected for the mixture under normal conditions of usage, the mixture is biologically inert.					
a)	<i>Acute toxicity</i> Based on available data, the classification criteria are not met. Based on composition, the mixture has low acute toxicity and no adverse effects for human health are expected under applicable conditions of exposure.					
<i>b)</i>	<i>Skin corrosion/irritation</i> Based on available data, the classification criteria are not met. The mixture has no direct corrosive / irritating properties. Melted product may cause serious burns following the contact with the skin.					
<i>c)</i>	Serious eye damage/irritation Based on available data, the c Melted product may cause ser	lassification crit			rect corrosive / irrita	ating properties.
<i>d)</i>	Respiratory or skin sensitisati Based on available data, the c		eria are not met.			
e)	 <i>Germ cell mutagenicity</i> Based on available data, the classification criteria are not met. 					
f)	<i>f)</i> Carcinogenicity Based on available data, the classification criteria are not met.					
g)	 Reproductive toxicity Based on available data, the classification criteria are not met. 					
h)	 <i>STOT-single exposure</i> Based on available data, the classification criteria are not met. Inhalation of dust loosened dust during manipulation can mechanically irritate airways. However, these effects do not require classification. 					anipulation can
i)	<i>STOT-repeated exposure</i> Based on available data, the c	lassification crit	eria are not met.			
j)	Aspiration hazard Based on available data, the classification criteria are not met.

Advice on any training appropriate for workers

Before handling, storing or using the present substance for the first time, employees must be informed - common training for handling chemicals, occupational safety training.

Other information

Safety Data Sheet (SDS) is compiled in accordance with latest legislation and contains information on safety use, occupational health protection, and environmental protection. The information contained herein is given in good faith and is accurate to the best of knowledge at the date indicated above. This particular information applies on the product as supplied and may not be valid in mixtures with other substances. If used for other purposes as identified in this SDS, the distributor is not liable for any damage.

The information given herein in no way dispenses the user from knowing and applying all provisions regulating his activity. The user bears sole liability for the precautions required when using the product. The regulatory texts indicated herein are intended to aid the user to fulfill his obligations. This list is not to be considered complete and exhaustive. It is the user's responsibility to ensure that he is subject to no other obligations than those mentioned.
